

Bellevue College – Science Class for Children
DISCOVERY LAB
OPEN HOUSE

Monday, February 6th 3:30 – 4:30 pm
Wednesday, February 8th 1:30 – 2:30 pm

Do you know a “Science Kid”? Do you know that a “rich” experience builds “rich” brains? And that science and math learning, nurtured early and steadily in a child’s life, promotes critical thinking, problem solving, and self-confidence?

Discovery Lab provides that rich science experience for kids 5-7, offering hands-on science inquiry and thinking. This well-rounded curriculum introduces children to science as an enjoyable and accessible investigation of the world around us. Each week students investigate a specific scientific topic, conduct experiments, and design creative science projects. Along with our teachers, parents assist children’s exploration in the classroom 6-7 times a year, and meet as a group with a college parent educator monthly to discuss topics relevant to raising elementary school-age children.

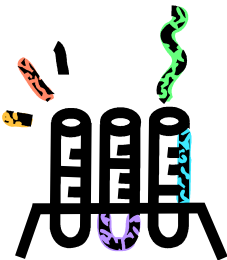

Class Location: Robinswood Park Barn, 2432 - 148th Ave SE, Bellevue.

Classes for 2012-13 year:

Monday, 3:45 to 5:45 pm
Wednesday, 2:00 to 4:00 pm

Information: 425/564-2365
